Education

Illinois Institute of Technology August 2018 - May 2024
Bachelor of Science, Artificial Intelligence,
Minor In Applied Mathematics
Masters of Science, Business Analytics May 2024 – December 2025
- International Student merit-based Scholarship

Course Projects:

Business Decision Modeling in Excel

- Developed financial decision-support models to evaluate investment and marketing scenarios using break-even analysis and scenario modeling
- Applied Solver, Data Tables, and sensitivity analysis to test assumptions, quantify risk, and compare alternative business outcomes
- Translated model outputs into clear, stakeholder-ready insights, presented in a structured business strategy simulation to support decision-making

COVID-19 Vaccination Sentiment Analysis

- Led development of a sentiment analysis dashboard analyzing 1M+ social media records to assess public opinion on COVID-19 vaccination
- Implemented BERT-based sentiment classification to identify trends, shifts, and patterns in public perception over time
- Delivered interpretable visual reports and summaries to support communication and outreach strategies for public health stakeholders
- Presented findings through stakeholder-friendly dashboards and reports in meetings and academic panels

Search Engine Development

- Designed an information retrieval system leveraging NLP-based indexing and ranking to improve content discoverability
- Applied relevance scoring and query optimization techniques, reducing search response time by 25% and improving user experience
- Integrated business logic with user-focused design, including query expansion and result optimization
- Documented system workflows and logic to support future scalability, maintenance, and knowledge transfer

ZebrA Infiltrator: Cybersecurity Startup Plan

- Conducted market research and competitive analysis for a simulated AI-driven cybersecurity startup
- Developed customer segmentation, pricing strategy, and go-to-market plan based on competitive benchmarking
- Evaluated market positioning and differentiation by benchmarking against industry leaders such as CrowdStrike
- Created executive-level presentation decks to communicate strategic recommendations and growth opportunities

Rideshare Application Development

- Built a rideshare backend with emphasis on data modeling, operational workflows, and location-based logic
- Designed relational database schemas and executed SQL queries to support user management, trip data, and operational tracking
- Integrated external data sources (Google Maps API) to enable distance calculation and performance analysis
- Maintained structured documentation and followed agile planning and iterative testing cycles to deliver a deployment-ready prototype

Strategic Roadmap for USPS Drone Delivery

- Developed a composite strategic roadmap evaluating the integration of AI-driven drone technology into USPS delivery operations
- Conducted SWOT analysis to assess feasibility, risks, and long-term operational impact of autonomous delivery solutions
- Modelled potential efficiency and cost implications to support strategic planning decisions
- Addressed ethical considerations and workforce planning, aligning technology adoption with organizational sustainability

Achievements:

- Built a web app with a team in the first crypto-based Chicago Hackathon to help immigrants through donations and took first place. February 2024

Personal Project:

- Joined SAE as part of the software development team to help build key components of the dashboard for the electric car which was influential for the Formula SAE competition. August 2020
- Played a key role in the Illinois Tech Robotics team's first-place win at the VEX Robotics competition by focusing on building the robot's structure. My contributions helped ensure the robot was durable and functional, emphasizing the importance of teamwork and strategic execution in competitive robotics. October 2023

Skills: SQL (Postgres, Oracle), Python, Java, Tableau, Excel, Figma (Basic UI Mockups), Jira, Agile Methodologies, Business Process Documentation, Workflow Diagrams, Use Case Creation, Technical Communication

Experience

Global Shala, Chicago, United States of America June 2022
IT department: Data Analyst intern

- Performed real-time data analysis and created interactive dashboards using Tableau and Excel to inform decision-making.
- Developed written and visual documentation to support business reporting processes and guide non-technical team members.
- Collaborated cross-functionally to validate requirements, gather stakeholder input, and iterate data-driven business insights.
