Education

Illinois Institute of Technology August 2018 - May 2024
Bachelor of Science, Artificial Intelligence,
Minor In Applied Mathematics
Masters of Science, Business Analytics May 2024 – December 2025
- International Student merit-based Scholarship

Course Projects:

Business Decision Modeling in Excel

- **Built financial decision-support models to evaluate investment and marketing scenarios using break-even analysis, Solver, and multi-variable data tables**
- **Applied sensitivity analysis to assess risk, trade-offs, and outcome variability under changing assumptions**
- **Translated quantitative results into clear, stakeholder-ready insights, presented in a business strategy simulation format to support decision-making**

COVID-19 Vaccination Sentiment Analysis

- **Led development of a sentiment analysis dashboard analyzing 1M+ tweets to assess public opinion on COVID-19 vaccination**
- **Applied BERT-based transformer models to classify sentiment and track shifts in public perception over time**
- **Delivered interpretable visual reports and dashboards to support communication strategy decisions for public health stakeholders**
- **Created stakeholder-friendly summaries and presentations, communicating insights in meetings and academic panels**

Search Engine Development (Analytics & Information Retrieval Focus)

- **Designed an NLP-based information retrieval system using Python and Scikit-Learn to support indexing, ranking, and relevance scoring**
- **Improved query response time by 25%, enhancing usability and system efficiency**
- **Integrated business logic with user experience considerations, including query expansion and result optimization**
- **Documented system logic, workflows, and functionality to support future scalability and knowledge transfer**

ZebrA Infiltrator: Cybersecurity Startup Plan

- **Conducted market research and competitor analysis for a simulated AI-based cybersecurity startup**
- **Developed customer segmentation, pricing strategy, and go-to-market plan based on competitive benchmarking**
- **Created executive-level presentation decks, benchmarking strategy against industry leaders such as CrowdStrike**
- **Applied analytical reasoning to evaluate market positioning, differentiation, and growth opportunities**

Rideshare Application Development (Data & Process-Oriented)

- **Built a rideshare backend with focus on data modeling, operational workflows, and location-based analytics**
- **Designed relational database schemas, executed SQL queries, and maintained structured documentation for deployment and user management**
- **Integrated external data sources (Google Maps API) to support distance calculation and operational tracking**
- **Demonstrated agile planning, iterative testing, and version control to deliver a functional prototype**

Strategic Roadmap for USPS Drone Delivery

- **Developed a composite strategic roadmap evaluating the integration of AI-driven drone technology into USPS delivery operations**
- **Conducted SWOT analysis and projected operational, cost, and efficiency impacts of autonomous delivery solutions**
- **Evaluated ethical, workforce, and organizational implications associated with large-scale operational transformation**
- **Synthesized findings into structured strategic recommendations to support long-term planning and decision-making**

Achievements:

- Built a web app with a team in the first crypto-based Chicago Hackathon to help immigrants through donations and took first place. February 2024

Personal Project:

- Joined SAE as part of the software development team to help build key components of the dashboard for the electric car which was influential for the Formula SAE competition. August 2020
- Played a key role in the Illinois Tech Robotics team's first-place win at the VEX Robotics competition by focusing on building the robot's structure. My contributions helped ensure the robot was durable and functional, emphasizing the importance of teamwork and strategic execution in competitive robotics. October 2023

Skills: SQL (Postgres, Oracle), Python, Java, Tableau, Excel, Figma (Basic UI Mockups), Jira, Agile Methodologies, Business Process Documentation, Workflow Diagrams, Use Case Creation, Technical Communication

Experience

Global Shala, Chicago, United States of America June 2022
IT department: Data Analyst intern

- Performed real-time data analysis and created interactive dashboards using Tableau and Excel to inform decision-making.
- Developed written and visual documentation to support business reporting processes and guide non-technical team members.
- Collaborated cross-functionally to validate requirements, gather stakeholder input, and iterate data-driven business insights.
