Education

Illinois Institute of Technology August 2018 - May 2024
Bachelor of Science, Artificial Intelligence,
Minor In Applied Mathematics
Masters of Science, Business Analytics May 2024 – December 2025
International Student merit-based Scholarship

Course Projects:

Deloitte Australia – Data Analytics Job Simulation (Virtual Internship)
Completed July 2025

- Developed a Tableau dashboard to monitor trends, outliers, and patterns within structured transaction datasets.
- Transformed raw datasets into business-ready reporting by applying data classification, validation logic, and hypothesis-driven analysis in Excel.
- Presented insights in a consulting-style format, translating analytical findings into clear recommendations for stakeholders.

COVID-19 Vaccination Sentiment Analysis

- Built a large-scale analytics pipeline in Python to clean, process, and analyze 1M+ unstructured social media records for sentiment and trend detection.
- Produced decision-ready insights by aggregating results and delivering visual reporting dashboards showing sentiment shifts over time.
- Translated model outputs into stakeholder-friendly summaries, emphasizing patterns, risk signals, and actionable narrative conclusions.

Rideshare Application Development

- Developed a rideshare application **using Django, SQL, and Google API**, focusing on backend development, location tracking, and scalable database management.
- Delivered a fully functional prototype within 8 weeks, demonstrating skills in **full-stack development** and **third-party API integration**, enhancing team collaboration and project success.

Retail Operations Optimization – Foxcore Retail

- Built a normalized relational database (10+ tables, 3NF) integrating sales, customer, events, and commission datasets to support cross-functional reporting.
- Wrote and optimized SQL queries (joins, aggregations, segmentation logic) to generate performance datasets for business health tracking and operational reporting.
- Conducted data validation and quality checks to reconcile inconsistencies across tables and ensure reporting accuracy and integrity.
- Produced KPI-ready outputs to support insights on sales performance, inventory movement, and customer purchase patterns.

Search Engine Development

- Developed a scalable Python-based search solution using NLP ranking methods (TF-IDF, cosine similarity) and implemented performance improvements.
- Improved response time by 25%, applying iterative testing and optimization to enhance system usability.
- Documented logic and workflows to support repeatability and operational maintainability.

Decision Modeling for Business Optimization

- Built automated reporting models in Excel using pivot tables, Solver, scenario tools, and sensitivity analysis to evaluate business decisions.
- Modeled outcomes for pricing and investment tradeoffs through break-even, profit maximization, and what-if simulations.
- Presented results in structured reports that translated quantitative outputs into strategic business recommendations.

Achievements:

- Built a web app with a team in the first crypto-based Chicago Hackathon to help immigrants through donations and took first place. February 2024

Personal Project:

- Joined SAE as part of the software development team to help build key components of the dashboard for the electric car which was influential for the Formula SAE competition. August 2020
- Played a key role in the Illinois Tech Robotics team's first-place win at the VEX Robotics competition by focusing on building the robot's structure. My contributions helped ensure the robot was durable and functional, emphasizing the importance of teamwork and strategic execution in competitive robotics. October 2023

Skills: Python, Java, C++, Django,

Experience

Global Shala, Chicago, United States of America June 2022
IT department
Data Analyst

- Performed data analysis on real time data to provide expert guidance.
- As part of the research team, developed visual graphs using essential critical thinking skills to signify the evidence.
- Implemented **tableau, excel** in aiding the visualization
