Education

Illinois Institute of Technology — August 2018 - May 2024
Bachelor of Science, Artificial Intelligence,
Minor In Applied Mathematics
Masters of Science, Business Analytics — May 2024 – December 2025
International Student merit-based Scholarship

Course Projects:

Deloitte Australia – Data Analytics Job Simulation (Virtual Internship)
Completed July 2025

- Completed a structured Deloitte consulting simulation focused on forensic analytics and fraud detection, supporting data-driven investigation workflows
- Built an interactive Tableau dashboard to visualize transactional trends, anomalies, and risk indicators for stakeholder review
- Applied Excel-based classification and hypothesis testing to analyze transaction patterns and evaluate potential fraud scenarios
- Synthesized findings into client-ready insights and business conclusions, simulating real-world consulting deliverables and executive communication

COVID-19 Vaccination Sentiment Analysis

- Designed and implemented an end-to-end NLP analytics workflow to assess public sentiment toward COVID-19 vaccinations using over 1 million tweets
- Applied BERT-based transformer models to classify sentiment and identify trends across time and topics
- Translated model outputs into real-time sentiment insights and visual summaries, which were presented to public health teams
- Framed analytical findings to support communication and outreach strategy decisions, emphasizing interpretability and societal impact over model complexity

Retail Operations Optimization – Foxcore Retail

- Designed and implemented a normalized relational database (10+ tables, 3NF) to support retail sales, inventory, events, and commission tracking
- Developed SQL queries to analyze inventory levels, calculate sales commissions, and track customer purchase behavior
- Enabled operational reporting and performance analysis by creating a structured, scalable data foundation for downstream analytics
- Supported business decision-making by ensuring data integrity, efficiency, and consistency across retail operations

Decision Modeling for Business Optimization

- Built Excel-based decision models including break-even analysis, profit maximization, and sensitivity analysis to evaluate pricing and marketing scenarios
- Used Solver, Goal Seek, pivot tables, and multi-variable data tables to test assumptions and compare strategic alternatives
- Translated quantitative outputs into clear business recommendations, supporting data-driven decision-making under uncertainty
- Designed dynamic dashboards to communicate outcomes and trade-offs to non-technical stakeholders

Search Engine Development (Analytics & Information Retrieval Focus)

- Implemented an information retrieval system using Python to support data extraction, indexing, and relevance-based search
- Applied TF-IDF and cosine similarity to rank results and analyze query relevance
- Improved response time by 25%, enhancing usability and performance
- Framed the project around data processing, relevance scoring, and insight extraction, rather than system architecture

Rideshare Application Development (Data & Process Perspective)

- Developed a prototype rideshare platform with emphasis on data flow, location-based logic, and operational tracking
- Designed relational database structures and queries to support trip data, users, and routing logic
- Integrated external data sources (Google Maps API) to enable distance calculation and operational analysis
- Delivered a working prototype within 8 weeks, demonstrating structured execution, collaboration, and end-to-end problem solving

Achievements:

- Built a web app with a team in the first crypto-based Chicago Hackathon to help immigrants through donations and took first place.
  February 2024

Experience

Global Shala, Chicago, United States of America — June 2022
IT department
Data Analyst

- Performed data analysis on real time data to provide expert guidance.
- As part of the research team, developed visual graphs using essential critical thinking skills to signify the evidence.
- Implemented **tableau, excel** in aiding the visualization
