Education

Illinois Institute of Technology August 2018 - May 2024
Bachelor of Science, Artificial Intelligence,
Minor In Applied Mathematics
Masters of Science, Business Analytics May 2024 – December 2025
- International Student merit-based Scholarship

Course Projects:

Business Decision Modeling in Excel
- Built financial decision models to support business choices on investments and marketing.
- Used tools like Solver, Data Tables, and break-even analysis to simulate outcomes.
- Presented findings to stakeholders in a business strategy simulation format.

COVID-19 Vaccination Sentiment Analysis
- Led a team in developing a sentiment analysis dashboard using BERT transformer models on 1M+ tweets to assess public opinion on COVID-19 vaccination.
- Delivered real-time, interpretable visual reports to aid communication strategies for public health departments.
- Created stakeholder-friendly reports and dashboards to present findings in meetings and academic panels.

Search Engine Development
- Designed a search engine using Python, Flask, and Scikit-Learn with NLP-based indexing, ranking, and result optimization.
- Reduced query response time by 25% and implemented support for query expansion, showcasing business logic integration with user experience design.
- Documented backend logic and functionality workflows to enable future development or replication

ZebrA Infiltrator: Cybersecurity Startup Plan
- Led the market research and competitor analysis for a simulated AI-based cybersecurity startup.
- Developed pricing strategy, customer segments, and go-to-market plan.
- Created executive presentation decks and benchmarked against companies like CrowdStrike.

Rideshare Application Development
- Built a rideshare backend with Django, PostgreSQL, and Google Maps API for location and distance tracking features.
- Modeled database schema, performed SQL queries, and maintained robust documentation for deployment and user management.
- Demonstrated agile planning and iterative testing cycles with Git version control for deployment readiness.

Strategic Roadmap for USPS Drone Delivery
- Created a composite roadmap for integrating AI-driven drone technology in USPS delivery operations.
- Conducted SWOT analysis and projected operational impact of autonomous solutions.
- Addressed ethical concerns and workforce planning in transformation strategy.

Achievements:
- Built a web app with a team in the first crypto-based Chicago Hackathon to help immigrants through donations and took first place. February 2024

Personal Project:
- Joined SAE as part of the software development team to help build key components of the dashboard for the electric car which was influential for the Formula SAE competition. August 2020
- Played a key role in the Illinois Tech Robotics team's first-place win at the VEX Robotics competition by focusing on building the robot's structure. My contributions helped ensure the robot was durable and functional, emphasizing the importance of teamwork and strategic execution in competitive robotics. October 2023

Skills: SQL (Postgres, Oracle), Python, Java, Tableau, Excel, Figma (Basic UI Mockups), Jira, Agile Methodologies, Business Process Documentation, Workflow Diagrams, Use Case Creation, Technical Communication

Experience

Global Shala, Chicago, United States of America June 2022
IT department: Data Analyst intern
- Performed real-time data analysis and created interactive dashboards using Tableau and Excel to inform decision-making.
- Developed written and visual documentation to support business reporting processes and guide non-technical team members.
- Collaborated cross-functionally to validate requirements, gather stakeholder input, and iterate data-driven business insights.
