Education

Illinois Institute of Technology August 2018 - May 2024
Bachelor of Science, Artificial Intelligence,
Minor In Applied Mathematics
Masters of Science, Business Analytics May 2024 – December 2025
- International Student merit-based Scholarship

Course Projects:

Deloitte Australia – Data Analytics Job Simulation (Virtual Internship)
Completed July 2025

- Completed a structured Deloitte job simulation focused on forensic analytics and fraud detection.
- Built a dynamic Tableau dashboard to visualize trends in transactional data.
- Applied Excel for data classification and hypothesis testing to uncover business insights.
- Presented business conclusions to simulate client-facing deliverables in a consulting environment.

COVID-19 Vaccination Sentiment Analysis

- Led an NLP project **utilizing transformer models** to analyse public sentiment on COVID-19 vaccinations by processing over 1 million tweets and **applying BERT-based sentiment analysis**.
- Provided **real-time sentiment insights**, which were presented to public health teams to aid in communication strategies, enhancing public health messaging.

Rideshare Application Development

- Developed a rideshare application **using Django, SQL, and Google API**, focusing on backend development, location tracking, and scalable database management.
- Delivered a fully functional prototype within 8 weeks, demonstrating skills in **full-stack development** and **third-party API integration**, enhancing team collaboration and project success.

Retail Operations Optimization – Foxcore Retail

- Built a normalized relational database with over 10+ tables to support retail sales, events, and commissions.
- Wrote SQL queries to manage inventory, calculate commissions, and track customer purchase patterns.
- Ensured schema met 3NF standards for efficiency and scalability.

Search Engine Development

- Developed a search engine using **Python, Flask, Scrapy, and Scikit-Learn,** implementing web crawling, **indexing with TF-IDF and cosine similarity**, and a user-friendly interface.
- Achieved a **search response time improvement of 25%** and successfully handled query expansions and spelling corrections, showcasing skills in **NLP and web development.**

Decision Modeling for Business Optimization

- Used Excel to create break-even, profit-maximization, and sensitivity models with scenario tools, solver, and pivot tables.
- Developed multi-variable data tables to evaluate pricing and marketing decisions.
- Supported business recommendations through goal-seek analysis and dynamic dashboards.

Achievements:

- Built a web app with a team in the first crypto-based Chicago Hackathon to help immigrants through donations and took first place. February 2024

Personal Project:

- Joined SAE as part of the software development team to help build key components of the dashboard for the electric car which was influential for the Formula SAE competition. August 2020
- Played a key role in the Illinois Tech Robotics team's first-place win at the VEX Robotics competition by focusing on building the robot's structure. My contributions helped ensure the robot was durable and functional, emphasizing the importance of teamwork and strategic execution in competitive robotics. October 2023

Skills: Python, Java, C++, Django,

Experience

Global Shala, Chicago, United States of America June 2022
IT department
Data Analyst

- Performed data analysis on real time data to provide expert guidance.
- As part of the research team, developed visual graphs using essential critical thinking skills to signify the evidence.
- Implemented **tableau, excel** in aiding the visualization
