Education

Illinois Institute of Technology August 2018 - May 2024
Bachelor of Science, Artificial Intelligence,
Minor In Applied Mathematics
Masters of Science, Business Analytics May 2024 – December 2025
- International Student merit-based Scholarship

Course Projects:

Retail Operations Optimization – Foxcore Retail

- Designed a normalized relational database (10+ tables, 3NF) to support sales, inventory, and commission reporting.
- Wrote SQL queries to extract, reconcile, and validate operational data across multiple tables.
- Standardized metrics to enable consistent KPI reporting and downstream dashboard development.
- Ensured data accuracy and integrity by enforcing schema constraints and validation logic.

Deloitte Australia – Data Analytics Job Simulation

- Built interactive dashboards to visualize transactional trends and anomalies for investigative analysis.
- Used structured Excel-based analysis to validate results and confirm data consistency.
- Translated analytical findings into stakeholder-ready insights aligned with defined performance metrics.
- Simulated enterprise reporting workflows, emphasizing dashboard usability and repeatability.

COVID-19 Vaccination Sentiment Analysis

- Analysed 1M+ records to identify sentiment trends, drivers, and anomalies over time.
- Implemented sentiment classification and translated outputs into interpretable metrics and visual dashboards.
- Identified patterns supporting data-driven insight generation for strategic communication decisions.
- Ensured reporting outputs were validated, clear, and consumable by non-technical stakeholders.

Business Decision Modelling in Excel

- Built scenario-based financial models to evaluate investment and marketing decisions.
- Applied sensitivity analysis, Solver, and Data Tables to assess drivers, risks, and trade-offs.
- Synthesized outputs into actionable insights supporting operational and strategic planning.

Search Engine Development

- Designed data processing and ranking workflows to support relevance scoring and trend identification.
- Improved system efficiency by reducing response time by 25%.
- Documented data logic and workflows to support future analytics enhancements and scalability.

Rideshare Application Development

- Designed relational schemas and executed SQL queries to support operational data analysis.
- Documented workflows and data structures to support system evolution and platform changes.
- Supported iterative improvements through testing and data validation cycles.

Achievements:

- Built a web app with a team in the first crypto-based Chicago Hackathon to help immigrants through donations and took first place. February 2024

Personal Project:

- Joined SAE as part of the software development team to help build key components of the dashboard for the electric car which was influential for the Formula SAE competition. August 2020
- Played a key role in the Illinois Tech Robotics team's first-place win at the VEX Robotics competition by focusing on building the robot's structure. My contributions helped ensure the robot was durable and functional, emphasizing the importance of teamwork and strategic execution in competitive robotics. October 2023

Skills: Python, Java, C++, Django,

Experience

Global Shala, Chicago, United States of America June 2022
IT department
Data Analyst

- Performed data analysis on real time data to provide expert guidance.
- As part of the research team, developed visual graphs using essential critical thinking skills to signify the evidence.
- Implemented **tableau, excel** in aiding the visualization
