Education

Illinois Institute of Technology August 2018 - May 2024
Bachelor of Science, Artificial Intelligence,
Minor In Applied Mathematics
Masters of Science, Business Analytics May 2024 – December 2025
- International Student merit-based Scholarship

Course Projects:

Deloitte Australia – Data Analytics Job Simulation (Virtual Internship)
Completed July 2025

- Completed a structured Deloitte job simulation focused on forensic analytics and fraud detection.
- Built a dynamic Tableau dashboard to visualize trends in transactional data.
- Applied Excel for data classification and hypothesis testing to uncover business insights.
- Presented business conclusions to simulate client-facing deliverables in a consulting environment.

Sales & Operations Performance Analytics

- **Analyzed multi-source operational and performance data to identify reporting gaps and inconsistencies, improving data accuracy and enabling stakeholders to make timely execution decisions**
- **Built weekly and monthly performance dashboards in Excel and Tableau to track KPIs, which reduced ad-hoc reporting requests and improved visibility into trends and risks**
- **Consolidated fragmented datasets into a single performance view, allowing teams to quickly diagnose issues and prioritize operational actions**

Reporting, Dashboards & Business Reviews

- **Designed recurring performance reports aligned to business rhythms, supporting structured weekly reviews and leadership discussions**
- **Translated raw metrics into clear insights and recommendations, helping stakeholders understand drivers of performance rather than just results**
- **Improved reporting workflows by standardizing templates and logic, reducing manual rework and improving consistency across reports**

Cross-Functional & Operational Execution

- **Partnered with operations, finance, and marketing stakeholders to clarify data requirements and validate assumptions, ensuring alignment across planning and reporting**
- **Supported multiple concurrent deliverables under tight timelines, maintaining accuracy while meeting execution deadlines in fast-paced environments**
- **Acted as a point of coordination between teams by maintaining clean documentation and data definitions, reducing miscommunication and follow-ups**

Process Improvement & Problem Solving

- **Identified inefficiencies in reporting and data validation processes and implemented improvements, shortening turnaround time for insights and increasing stakeholder trust in data**
- **Applied analytical problem-solving to investigate performance anomalies, enabling teams to move from reactive reporting to proactive issue resolution**
- **Balanced speed and precision in execution-heavy analytics work, ensuring insights were both timely and reliable**

Achievements:

- Built a web app with a team in the first crypto-based Chicago Hackathon to help immigrants through donations and took first place. February 2024

Personal Project:

- Joined SAE as part of the software development team to help build key components of the dashboard for the electric car which was influential for the Formula SAE competition. August 2020
- Played a key role in the Illinois Tech Robotics team's first-place win at the VEX Robotics competition by focusing on building the robot's structure. My contributions helped ensure the robot was durable and functional, emphasizing the importance of teamwork and strategic execution in competitive robotics. October 2023

Skills: Python, Java, C++, Django,

Experience

Global Shala, Chicago, United States of America June 2022
IT department
Data Analyst

- Performed data analysis on real time data to provide expert guidance.
- As part of the research team, developed visual graphs using essential critical thinking skills to signify the evidence.
- Implemented **tableau, excel** in aiding the visualization
